

# Kadaster Data Platform

## Overview Architecture

Erwin Folmer | Kadaster | University of Twente | [erwin.folmer@kadaster.nl](mailto:erwin.folmer@kadaster.nl) Wouter Beek | Kadaster | VU University Amsterdam | Triply | [wouter@triply.cc](mailto:wouter@triply.cc)

**Dutch Cadastre is developing an innovative data platform for publishing its geospatial data as linked data.**

### Results so far:

- Platform released at [data.pdok.nl](http://data.pdok.nl)
- 3 formal key registers of the Dutch government published
- Billions of RDF triples
- Hundreds of millions of geospatial objects
- Actual data (by having daily updates)
- APIs available through openAPI specification, including documentation and postman integration
- Open SPARQL endpoint
- Forum for direct interaction with users
